## 2.4 inch VA LCD Module Customized COB LCM AIP31621E Driver White Backlight UPS LCD Display

### Product Description

#### Advantages of VA LCDs:

##### High Brightness:

VA panels can achieve **high peak brightness levels**, making them suitable for both **bright and dark environments**. However, the peak brightness might still be lower than that of high-end **IPS** or **OLED** displays.

##### Lower Power Consumption:

VA LCDs are generally **more power-efficient** than **IPS displays** due to the nature of the liquid crystal alignment. This results in **lower energy consumption**, which is a factor to consider in battery-powered devices or when operating in low-power scenarios.

##### Good for Watching Movies and Gaming:

The **high contrast** and **deep black levels** make VA displays excellent for **watching movies, gaming**, or other applications where the depth of the image is critical. They help create an immersive experience with rich, dark colors and excellent shadow details.
