Industrial Applications

Industrial Control: Serves as Human-Machine Interface (HMI) for displaying equipment status, operation instructions, and real-time data. Enables touch control for PLC panels and industrial robots.

Data Monitoring and Analysis: Displays production process data (temperature, pressure, flow) with analysis capabilities. Supports data printing and backup.

Equipment Operation Guidance: Provides intuitive operation steps and prompts, reducing learning curve for complex equipment operation.

Fault Diagnosis and Alarm: Monitors equipment status in real-time, displays alarm information, and provides troubleshooting suggestions when faults occur.
